

	ESP 02	
	PRODUCT SPECIFICATION	
SOYA EXPELLER		
Review number : 02 Emission date : 03/05/17	Page 1 of 1	*****

1. GENERIC DEFINITION OF PRODUCT

The Soya expeller is a byproduct of the oil extraction by an extrusion and pressing process.

2. INGREDIENTS

Soya Bean

3. PHYSICOCHEMICALS CHARACTERISTICS

Parameters	Value
Ureasic activity	<0.05 upH
Humidity	<7%
Crude Protein	>41%
Soluble Protein	>85%
Fat	7-8%
Metabolic Energy	2700-2800 Kcal

4. APLICATIONS

Due to the great protein content and furthermore the difference of the extracted pellets by solvents, it has a great input of fat and energy which is transformed in a very high nutritional raw material value for the animal elaboration industry.
